

MAINTAIN INFECTION CONTROL STANDARDS (SHBBINF001)

This unit describes the performance outcomes, skills and knowledge required to maintain infection control during skin penetration treatments and to review clinic compliance with the applicable state or territory and local council requirements.

It requires the ability to identify, manage and control infection risks to clients, self and work colleagues.

This unit applies to beauty therapists who work in beauty therapy salons, clinics or in cosmetic medical clinics. These therapists work autonomously and make independent treatment decisions.
